

(start belt #5)

he says there are not a limitation beyond the two years anyone corrects that by making a motion or a bill or some kind of an operation next January in order to do that then. Then he says of course that we are going to tax the poor instead of the rich and of course that is an argument that we all use, sometimes I over work it and in fact it is true. It has always been that way and this body of 49 and men and women, don't have the courage or the ability to change it. These things I think are completely immaterial and I just don't know how you are going to explain. A couple of days the bill had 35 votes and the bill hasn't been changed at all and we understood then as much as we understand now, there is really no reason why this bill shouldn't get 35 votes to override the Governor's veto. I don't say that against the Governor, even though I am in many cases and where I am I will say so. In this case that has no part of it. This is a matter that he and this body are in full agreement except as to minor details. If that is so, why then should we put off, today is the day. I hope that this body overrides his veto only for those reasons.

PRESIDENT: Chair recognizes Senator Nore.

SENATOR NORE: Mr. President, members, I wonder what the big hurry is in doing this the first thing this morning. It sort of reminds me of a promoter participating stock in an oil well. He used to tell the old fellows around my home town now for reasons that we have got to work fast on this and of course the reason he had to work fast was because it wasn't a very good investment. I think that I would like to say that I would like to wait till maybe after dinner before we vote on this because we have got a lot...I have a handout on this thing and other folks have got some things that they would like to look at and I voted for this 472 the first time around on Final Reading, but I have second thoughts on this two year situation. Now we did try this thing once. We appropriated 35 million I believe it was to lower the property taxes. How much property tax did it get lowered? What happened to the 35 million? You all know, I don't have to tell you what happened to it. Now when we pass the sales-income tax, the was to lower the property tax. I stood on this floor and I said that it would raise the taxes, that it will make them higher, and I'm....if we don't have this limitation on here for more than two years, you are going to have higher property taxes instead of lower property taxes. It has always happened in the past, why wouldn't it happen in the future. So lets look at the record and the past, on these state aid bills, and the sales income tax. We start new programs new programs, until right now we have almost compensating property taxes after we have had 35 million plus the sales and income tax to relieve property taxes. So I would like to wait until after dinner and give us a little time to think this over and talk to some of the opposition. I have talked to both sides and I'm not a politician or I wouldn't be standing here talking today. I try to look at both sides of the issue. So I would like to...I would very much like to wait until after dinner, before we vote on this and this voting on this the first thing this morning, I think that it is a little bit tricky.

PRESIDENT: Chair next recognizes Senator Fred Carstens, then Fellman, Keyes, Kelly Proud.

SENATOR CARSTENS: Mr. President, members of the legislature I have supported 472 and I have done it with a great deal of
